

Cosmedico

Ten years in a row and no looking back! Cosmedico is thrilled with the news that for a tenth consecutive year our CosmoLux9K90 has been chosen as the IST Industry Choice Award Winner for Favorite Low-Pressure Tanning Lamp! When we first set out to develop the CosmoLux 9K90 it was because of salon owners countrywide demanding a tanning lamp with never before seen UVA and previously unattainable usable life.

After years of developing and consumer feedback we introduced the 9K90. The lamp was a resounding success and the results are as stunning today as when the lamp was first rolled out in 2003.

We at Cosmedico had little to do with this award. It is our customers and dedicated salon owners that made this possible. We often witness the attention to detail and genuine love for the tanning industry salon owners have. It is because of that love we strive to develop innovative products to best suit the salon needs. The CosmoLux 9K90 is a direct result of that process. We pride ourselves on innovation and quality so salons can know when they use Cosmedico, they are using the best!

Thank you again to all of the hard working salons that push us to be our best! It is a humbling honor and we will continue to strive and be that partner you can count on!
